THE

BULLETIN

OF

TOKYO MEDICAL AND DENTAL UNIVERSITY

Vol. 24, No. 1.

Edited
and
Published
by

Tokyo Medical and Dental University
(Tokyo Ika Shika Daigaku)

Bunkyo-ku, Tokyo, Japan
CONTENTS

Part I. Medical Sciences

W. Tumrasvin, H. Kuranishi and R. Kano: Studies on Medically Important Flies in Thailand. II.—Record of four species of Lucilia Robineau-Desvoidy (Diptera: Calliphoridae) ................................................................. 1

N. Yamamoto, R. Hatano and T. Sunaga: The Protective Effect of Propranolol on Ischemic Myocardium:—An electron microscopic study ................................................................. 9

S. Takaoka: Wilms' Tumor: Evaluation of Histological Features ........................................ 27

T. Ishibashi and O. Matsubara: Studies on the Retrograde Pancreatography in Autopsy Specimens ........................................................................................................... 43

H. Ichikawa and O. Matsubara: Studies on the Microvasculature of Human Myocardium... 53

T. Takano, K. Honna and H. Maeda: Endogenous Carbon Monoxide Production in Alloxanized Rats ........................................................................................................... 67

Part II. Dental Sciences

T. Takatsu, T. Ikeda, C. Higashi, M. Inaka and T. Fuganuma: Structure and Hardness of Four Types of Amalgam........................................................................................................... 73

M. Kitoh, T. Suetsugu and Y. Murakami: Mechanical Behavior of Tooth, Periodontal Membrane, and Mandibular Bone by the Finite Element Method ........................................................................... 81

K. Ooya: A Scanning Electron Microscopic Study on the Differences between Newly Erupted Teeth and Old Teeth with Reference to Fissure Enamel Surfaces and Contents........................................................................................................... 89

S. Kuribara: An Electron Microscopic Observation on Cells Found in Bone Resorption Area Incident to Experimental Tooth Movement ........................................................................... 103

I. Nakazawa: A Clinical Survey of Removable Partial Dentures—Analysis of follow-up examinations over a sixteen-year period— ................................................................. 125
